Global Marine Survey and Claims Services

vrs»adjusters

vrs Adjusters provides cost-effective, timely, client-orientated survey and claims services across all classes of marine business and our global spread ensures rapid attendance at the loss location. All vrs members have long traditions of excellence in their home markets as well as a comprehensive understanding of the needs of their global clients.

Designated coordinators in each major trading region deliver ease of access to the whole network and ensure a consistently high service standard.

Our surveyors and adjusters have extensive experience throughout the marine class – hull, cargo, carrier's liability and, in some cases, energy and offshore. vrs marine surveyors and loss adjusters are usually highly qualified master mariners, naval, industrial or mechanical engineers and all vrs marine adjusters have in-depth insurance knowledge. Our major partners employ accountants and other forensic specialists in order to provide expertise in the adjustment of, for example, business interruption claims. Our ability to work together means we can provide a seamless service for project cargo and other complex marine risks.

We have the expertise to undertake all types of cargo surveys for the marine market, including:

- Pre-shipment
- Loading and discharge
- Damage assessment
- Loss investigation
- Risk assessment
- Hull and machinery damage and condition surveys
- On-hire and off-hire surveys
- Cargo contamination investigations.
