

vrs Adjusters, founded in 2003, is a top 3 global corporate and complex loss adjusting and claims management organisation, covering 140+ countries with 300+ offices and 2,500 staff.

Global Claims Services with an Asian touch

vrs Adjusters Asia Pacific Singapore, a member of the global vrs Adjusters network, provides unsurpassed adjusting and claims management services to global risk management, insurance and reinsurance markets, with a localised Asian knowledge and professional expertise. Every hour of every day, insurers, reinsurers, captives and corporates rely on vrs Adjusters as a strong business partner to enable them to deliver their own client promises.

Our clients recognize the benefits of working with a truly international adjusting team with strong localised knowledge. As a member of the global vrs Adjusters network, vrs Adjusters AsiaPac provides independent claims service and are leaders in the Corporate and Complex claims handling markets.

vrs global Adjusters comprises over 300 offices in more than 140 countries. Highly experienced loss adjusters and technical staff provide client-focused and independent local claims services across all lines of the insurance business. In Asia, the vrs Adjuster network comprises independent members operating in 13 countries.

Global Best Practice, Asian focus

- Professional, consistent and cost-effective loss adjusting and claims management services around the world with localised bespoke focus for each Asian territory
- Global best practice principles at all times – both technical and account management with Asian focus for each territory
- Full compliance with local laws and customs to facilitate fair and timely settlement of claims.
- Quality control and professionalism is the cornerstone of our philosophy and our approach to claims. We continually enhance our technical, operational and best practice principles to provide optimal value to our clients.
- Diligent account management and rigorous coordination ensure the right skills are applied to any situation without compromising quality or standards.

THIRD PARTY ADMINISTRATION

**OUR
SERVICES**

A core proposition for vrs Adjusters AsiaPac, is a swift and coordinated response: our aim is always to provide comprehensive incident management and business recovery, while managing spend in accordance with coverage.

Our designated major loss team leaders ensure that all claims are handled on a full ownership basis with support provided by specialist staff as required for individual losses.

All our major loss team leaders are extremely experienced. Primarily concerned with the mitigation of all aspects of the loss – and particularly BI – they will determine whether additional resources, such as forensic accountants, forensic investigators, engineers, lawyers and the like, are required at the early stage of the claim. Prompt agreement of the optimum material damage reinstatement programme and business recovery strategy is an essential part of process, and a particular skill of our teams.

Proactive management of stakeholder expectations throughout the life of the case ensures a ‘no surprises’ approach to claims resolution. Rapid, professional response leading to fast settlements and attendant indemnity savings. Commercially aware, highly experienced adjusting teams, always mindful of innovative solutions to problems and issues, driving early, mutually advantageous settlements where appropriate a strong focus on customer satisfaction

We will ensure early identification of recoveries and evidence gathering, followed by a review of leases and contracts to establish whether any contractual issues are relevant. Post-loss case reviews and strategy meetings – where can all stakeholders improve the service and risk management – as part of the incident management programme we provide insight into future loss avoidance.

In respect of Construction and Engineering losses, a thorough understanding of construction methods, contract law and procedures, mechanical, electrical and process engineering, information technology and local statutory regulations is a pre-requisite for the proper evaluation and assessment of each case.

Our service proposition

A sound knowledge of contracts, local contract law, statute and policy interpretation is imperative. Only then can a proper assessment of policy liability be made, enabling the policy to be correctly applied, quantum managed and, if relevant, subrogation pursued.

In connection with Energy claims, a multi-disciplinary approach to the handling of material damage, DSU, BI and liability claims that occur during the generation and distribution of all forms of electrical power. Modern power generation technologies are increasingly automated and complex and claims require particularly specialized knowledge of design, engineering processes, and operation and maintenance procedures for a satisfactory adjustment. Our engineers are familiar with the many different types of power generation technologies from the site where electricity is generated to the final consumption point. The Energy industry is particularly predisposed to business interruption losses. When necessary, our engineers work closely with forensic accountants, who have specific knowledge of the power industry’s financial and contractual arrangements.

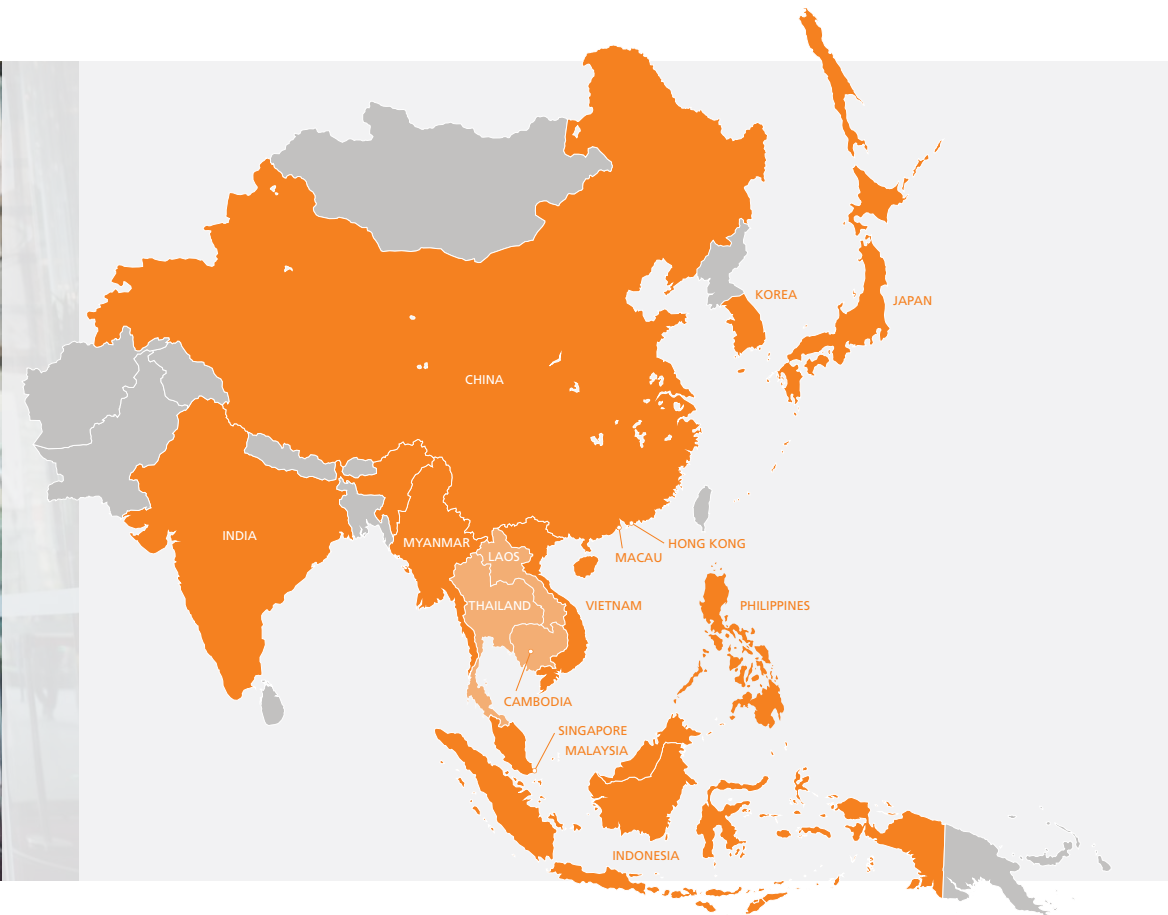

In each assignment, we undertake to be professional, transparent, collaborative, responsive and ensure open communication with all stakeholders.

We aim to provide best global claims service, locally delivered.
